

Barbara Bardelmeier

Solution Consultant II at Anheuser-Busch InBev

Experience

Solution Consultant II at Anheuser-Busch InBev

January 2010 - Present (6 years)

SYSTEMS ENGINEER III at Anheuser-Busch InBev

September 2004 - December 2009 (5 years 4 months)

Application Development, Testing Center of Excellence

Sr. Test Analyst, Consultant at Anheuser-Busch

February 2002 - September 2004 (2 years 8 months)

Responsible for analyzing project scope, business, and functional requirements to determine high-level test scope and detailed test data requirements. Developed test strategies and documenting test plans for multiple projects, iterations, and releases. Developed test cases, which covered multiple types of testing including functional, user interface, database, performance, security, configuration, interface, regression, and installation. Prepared structured test runs and executed test cases throughout various phases of the iterative development process. Worked with external vendors to coordinate the test effort and execute interface tests. Analyzed test results and documented application defects in the defect tracking system. Prepared quality assurance metrics as needed for the individual projects. Communicated with project team members to review progress, resolve issues, address risks, and provide direction on continued test execution effort. Provided recommendations on business application critical quality and release readiness. Prepared materials, coordinated, and presented user acceptance testing. Provided recommendations and implemented strategies with the project team members on how to improve the testing process, and reduce time for test execution. This included implementing new test tools specific to the needs of the project. Provided recommendations and implemented a defect tracking process. Interfaced with other areas of the Project Team including Project Management, Business Managers, Technical Analysts, and End Users. Assisted with validating the various enterprise wide environment components. Regression tested the applications when these environments were upgraded as well. Utilized the following test tools; Rational Requisite Pro, TestManager, ClearQuest, HP Quality Center, Radview WebLoad, XMLSpy, TOAD, and RFHUtil.

Sr. Technical Consultant, Staff Manager at Ajilon Consulting

April 2001 - September 2004 (3 years 6 months)

Primary skill areas – Test Team Lead, Software Testing and Quality Assurance, Testing Tools and Methodologies, Business Analyst Staff Manager for nine consultants in the Development, Business Analyst, and Quality Assurance areas.

Sr. Test Analyst, Consultant at Elsevier

April 2001 - February 2002 (11 months)

Responsible for analyzing project scope, business, and functional requirements to determine high-level test scope and detailed test data requirements. Assisted with the implementation of structured testing processes in conjunction with the Rational Unified Process. Developed test plans by application using the Rational Unified Process. Developed test cases, which covered multiple types of testing including functional, user interface, database, performance, security, configuration, interface, regression, and installation. Prepared structured test run scenarios and executed test cases throughout various phases of the development life cycle including certification of release in production. Developed a test strategy, documented user interface and configuration test scenarios, and coordinated the test effort for the execution of these scenarios with an external testing vendor. Communicated with the vendor to review progress, resolve issues, document defects, and provide direction on continued test execution effort. Analyzed all other test results and documenting application defects in the defect tracking system. Managed defects and change requests, and preparing daily Sr. Management QA Reports. Provided recommendations on business application critical quality and release readiness. Coordinated the QA department's test effort in absence of QA Manager including migration of code and configuration changes to the test and production environments. Interfaced with other areas of the Project Team including Project Management, Business Managers, Technical Analysts, and End Users.

Test Team Lead, Rental Systems at Enterprise Rent-A-Car

June 1999 - April 2001 (1 year 11 months)

Responsible for leading teams of Test Analysts who analyzed, documented, and tested Client Server, Web, and AS/400 applications. Developed detailed project plans, and monitored all phases of the project. Assisted with the complete implementation of Rational Tool Suite into the test environment. Analyzed and developed a structured test methodology. Modified this methodology to work in conjunction with the Rational Unified Process. Analyzed and developed an overall strategy for effective and efficient test automation, which utilized advanced automation techniques. Interfaced directly with all areas of the Project Team. Analyzed business functions and developed detailed test strategies and scope. Documented test requirements and test cases by application. Performed integration, system and regression testing in both manual and automated modes. Coordinated user acceptance testing.

Consultant at Interim Technology

March 1998 - April 1999 (1 year 2 months)

Testing Specialist, United States Postal Service, St. Louis, MO; September 1998 to April 1999. Analyzed business functions, and developed test requirements. Developed and documented a test plan for system and user acceptance testing. Performed system and user acceptance testing. Interfaced directly with all areas of the Project Team. Test Team Lead, First Security Bank, Salt Lake City, UT; March 1998 to August 1998. Led a team of six analysts who analyzed and tested mainframe applications. Developed detailed project plans and monitored all project activities. Assisted with the analysis, development, and improvement of new and existing processes and procedures used in the Project Life Cycle. Interfaced directly with all areas of the

Project Team. Analyzed business functions and developed test requirements. Developed and documented test plans and test cases by application. Executed test cases for online/batch applications and performed regression, validation, and user acceptance testing.

Assistant Vice President, Operations Manager at Mercantile Bank

June 1990 - November 1997 (7 years 6 months)

Operations Manager; Responsible for managing all Lockbox Operations, which was a 24X7 Operation and consisted of 120 employees. Functioned as business application owner for the Lockbox, Safe Deposit and Bank-By-Mail applications, which included planning all phases of code implementation. Responsible for analyzing department operations to identify cost saving opportunities and operational improvements. Optimized operations processes and reduced complexity where possible. Identified and implemented cost savings opportunities focusing on the operations process. Was able to reduce unit cost (cost per item processed) by more than almost 10% over a 2 year period. Operations liaison for all Wholesale Lockbox Corporate customers. Managed an annual budget 4.3 million. Operations Officer; June 1991 to June 1994. Responsible for managing all Statement Processing Operations including all planning for system enhancements, bank conversions, and consolidations. Performed as SME for all conversion projects. Managed a team of 36 individuals, and an annual budget of 1.3 million. Methods Analyst; June 1990 to June 1991. Performed work method and measurement studies on the various banking operations depts, Key objectives were to analyze operational activities, optimize processes, identify cost saving opportunities and opportunities to implement automation. Analyzed banking operations, identify key volumes, and baselined current operation productivity levels. Implemented a productivity measurement system for each operation department to track KPI's that would target improving efficiency and quality. Analyzed and implemented various productivity and quality enhancements within and across departments in order to streamline operations enterprise wide.

St. Louis Community College

Associate, Engineering Science, 1985 - 1986

Barbara Bardelmeier

Solution Consultant II at Anheuser-Busch InBev

1 person has recommended Barbara

"During my engagement with A-B, Barbara supplied me with many of the requirements for A-B's new ClearQuest workflows and schemas in a concise, logical and thorough manner. During testing stage she created and executed a set of test cases that allowed me to quickly resolve defects and to win buy-of from the client. Through-out, Barbara was personable, freindly and a lot of fun to work with."
